Health Record …… Pedigree ……Avid Microchip # ……

Warranty: I guarantee this Boxer's health for 2 weeks, provided that you have him checked, by a licensed veterinarian, within 3 working days of this agreement, and that you follow sound feeding practices.
Puppies are vulnerable to neighbours' dogs diseases. If any problems are found by the vet., at your choice, I'll pay reasonable vet. fees, totally refund your money, taking the puppy back or replacing the puppy, if I'm able.

Breeding; I advocate neutering (spaying) of pet Boxers, after the age of 6 months.
Earcrops: May be done, after 6 weeks. Unnecessary these days.
Feed: I feed Iams and will give you a starter supply. Good food costs more but pays for itself, Moisten it with hot water, up to ¼ of a meal may be good hamburger, cottage cheese or a good canned food. Don't get carried away, making changes. When you do, go slowly mixing the new food with old. Young puppies need three meals daily. Remove uneaten food, after 15 minutes , to encourage good eating habits.
Health. Keep your yard picked up, burying, or flushing, the excreta. Here we need to battle fleas, flies and roaches, Keep immunizations current; do not overdo or you might induce auto-immune diseases.

House Training. Consistency is the answer. Anoint the appointed place with soiled newspaper or puppy pads. Out he goes, after awakening, meals and play. Give lavish praise for performance. Do not scold, his immature systems need to mature.
Call only for good things; he wants to please you. Chastising will only confuse him.

Parasites:
Coccidia. An amoeba like organism, which causes diarrhea. Albon, from veterinarian, or feed store, is the cure.
Fleas & ticks. Dangerous, carry tapeworms & Lyme disease. Get a control plan from your veterinarian. Flea collars are useless, comparable to band aids.
Worms. Do not do this freely; get stools checked, by vet. dogs m ay be infected by hookworms, roundworms, whipworms and tapes.

Continue heartworm prophylaxis year round. Monthly oral medication is best. Avoid 6 monthly products.

Enjoy your Boxer for many years. If you get problems, call me and I'll help you.
